ECC006 Homework Assignment #3

Sondos Deeb - 20224462

1. Consider the following code, in which some CSS properties and values, indicated by "_", and some HTML tags, indicated by, are missing:

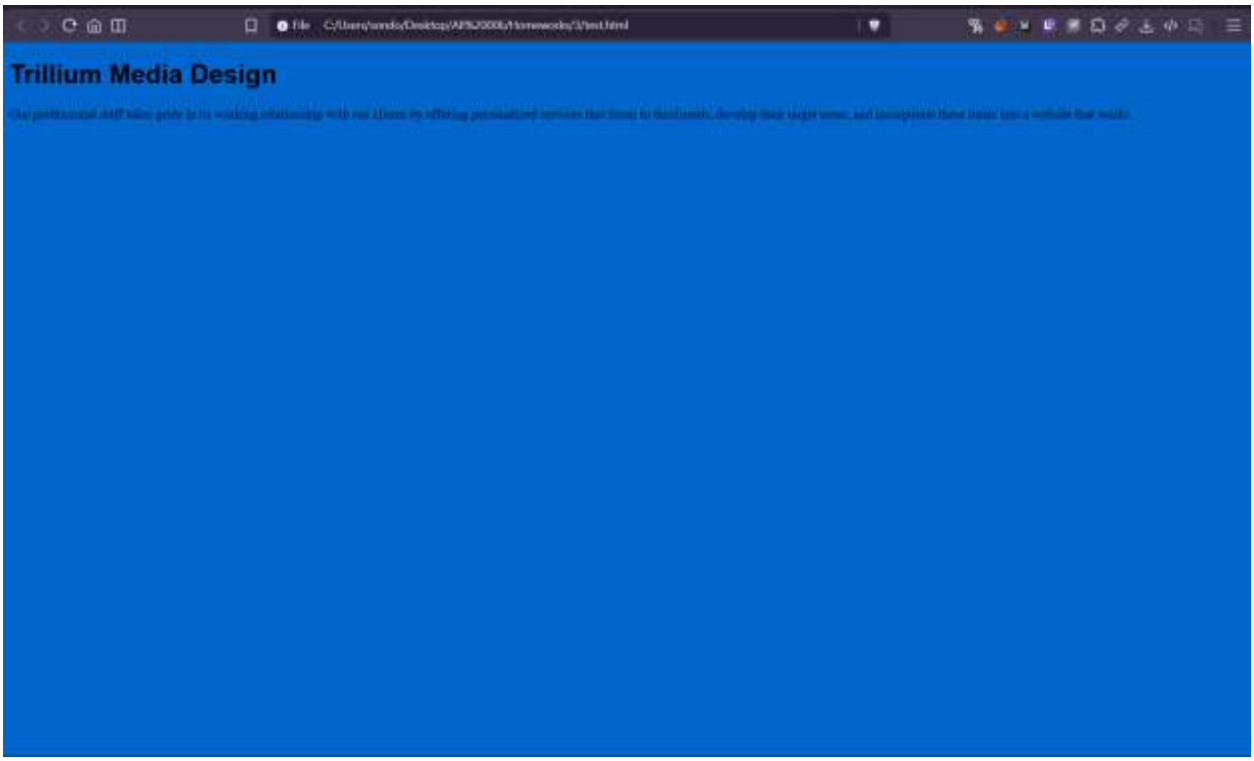
```
<!DOCTYPE html>
<html lang="en">
<head>
<title>Trillium Media Design</title>
<meta charset="utf-8">
<style>
body { background-color: #0066CC;
color: "_"; }
header { "_": "_" }
<_>
<_>
<body>
<header><h1>Trillium Media Design</h1></header>
<p>Our professional staff takes pride in its working relationship with our clients by offering personalized services
that listen to their needs, develop their target areas, and incorporate these items into a website that works.</p>
</body>
</html>
```

The web page corresponding to the code should be configured so that the background and text colors have good contrast. The header area should use Arial. Fill in the missing code.

Here is my solution after I filled the code:

```
<!DOCTYPE html>
<html lang="en">
<head>
<title>Trillium Media Design</title>
<meta charset="utf-8">
<style>
body { background-color: #0066CC;
color: "while"; }
header { font-family: "Arial" }
</style>
</head>
<body>
<header><h1>Trillium Media Design</h1></header>
<p>Our professional staff takes pride in its working relationship with our
clients by offering personalized services
that listen to their needs, develop their target areas, and incorporate these
items into a website that works.</p>
</body>
</html>
```

Here’s how the site looks like after filling the missing code:

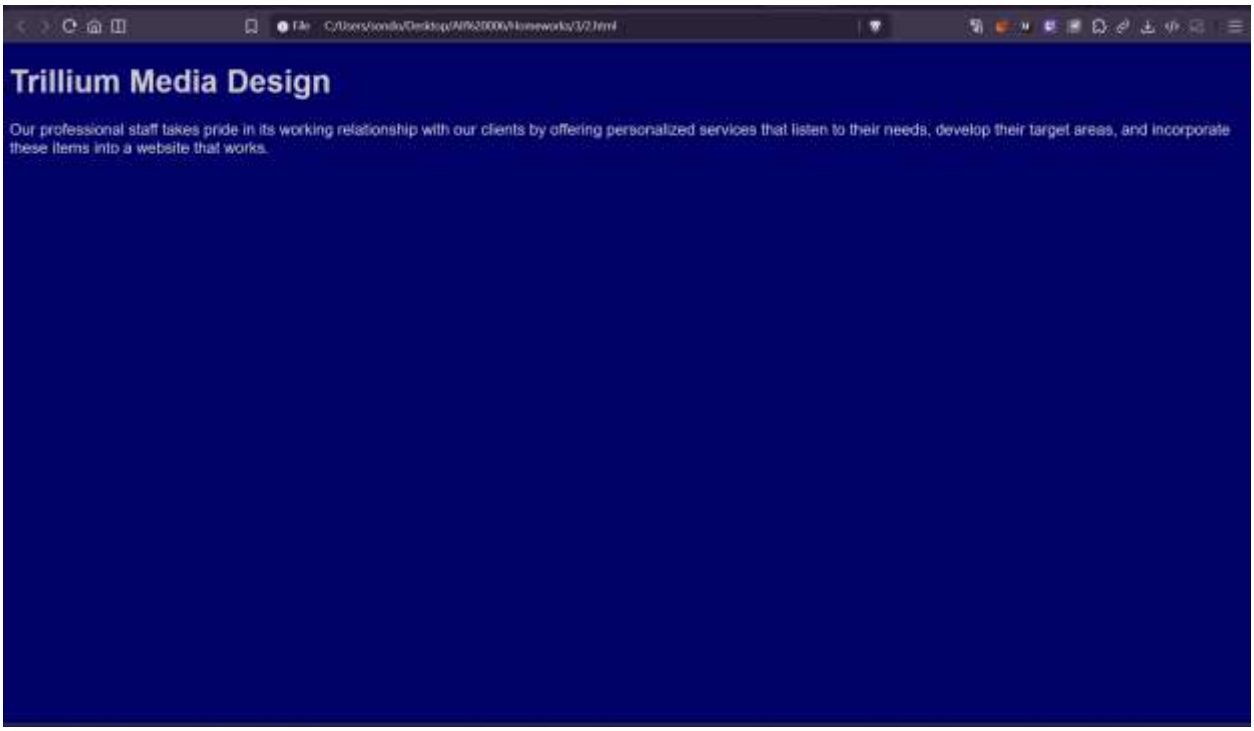


2. Find the Error. Why won't the page corresponding to the following code display properly in a browser?

```
<!DOCTYPE html>
<html lang="en">
<head>
<title>Trillium Media Design</title>
<meta charset="utf-8">
<style>
body { background-color: #000066;
color: #CCCCCC;
font-family: Arial,sans-serif;
font-size: 1.2em; }
<style>
</head>
<body>
<header><h1>Trillium Media Design</h1></header>
<main><p>Our professional staff takes pride in its working relationship with our clients by offering personalized
services that listen to their needs, develop their target areas, and incorporate these items into a website that
works.</p></main>
</body>
</html>
```

I had to add slash ("/") to the closing style tag , that was the error that's stopping the page from functioning properly

Here's the full code after fixing the error:

```
<!DOCTYPE html>
<html lang="en">
<head>
<title>Trillium Media Design</title>
<meta charset="utf-8">
<style>
body { background-color: #000066;
color: #CCCCCC;
font-family: Arial,sans-serif;
font-size: 1.2em; }
</style>
<!-- added "/" for style tag -->
</head>
<body>
<header><h1>Trillium Media Design</h1></header>
<main><p>Our professional staff takes pride in its working relationship with our
clients by offering personalized
services that listen to their needs, develop their target areas, and incorporate
these items into a website that
works.</p></main>
</body>
</html>
```


Here’s how the site looks after fixing it :
